## Food Technology Puzzle

See if you can work out what these ingredients from the Food Technology kitchen add up to. A recipe is included below that you can make at home.

$$\begin{aligned} & \text{Raspberry} + \text{Raspberry} + \text{Raspberry} = 30 \\ & \text{Raspberry} + \text{Egg} + \text{Egg} = 18 \\ & \text{Egg} - \text{Butter} = 2 \\ & \text{Butter} + \text{Raspberry} + \text{Egg} = \underline{16} \end{aligned}$$

### Brain Teaser

In the kitchen we use a variety of tools to measure ingredients.

1 tablespoon = 20mls

1/4 cup = 60 mls

Can you solve the following dilemma?

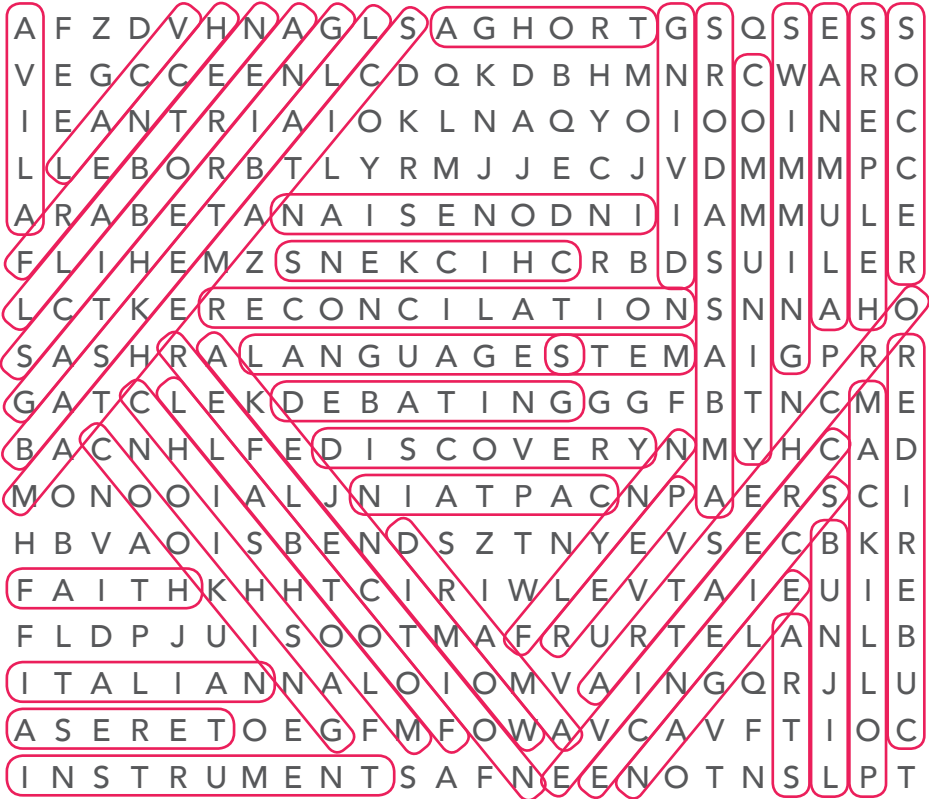

An Avila student is in the Food Technology kitchen and only has tablespoons. Her recipe asks for a quarter cup of vegetable oil.

How would she measure out the oil?

**1/4 cup = 3 x tablespoons**
